second most common cancer in both men and For Chinese Americans, colon cancer is the

# **HOW CAN I PREVENT COLON CANCER?**

- Regular colon cancer screenings (tests that can find polyps or early colon cancer)
- Colon cancer screenings should start at

### WHICH COLON CANCER SCREENING TEST SHOULD I GET?

- There are 3 effective tests
- You may only need one
- Talk to your doctor to pick a test

# 1. Fecal Occult Blood Test (FOBT)

Your doctor gives you a kit to do this test at home. You collect some stool samples with the kit and mail it back to your doctor or laboratory. FOBT should be done once a year.

### Sigmoidoscopy

lower colon. The procedure is done at a doctor's polyps or signs of cancer inside your rectum and Your doctor uses a soft lighted tube to look for office, clinic or hospital.

Sigmoidoscopy should be done once every 5 years.

### 3. Colonoscopy

entire colon. This procedure is done at a hospital. Colonoscopy should be done once every 10 Your doctor uses a longer tube to look at the

### **ARE THERE ANY OTHER WAYS TO PREVENT** COLON CANCER?

Regular colon cancer screening is the only proven method to prevent colon cancer.

The following may help lower your chance of getting cancer, but they DO NOT completely prevent it:

- Eat a healthy diet (low in fat and high in fruits and vegetables)
- Do not smoke cigarettes

You also can ask your doctor about:

- Medicines (such as aspirin)
- Regular exercise

# **40W MUCH DO THESE TESTS COST?**

Health insurance and government health programs usually pay for these tests.

San Francisco resident, you can apply for "Healthy If you do not have health insurance and you are a San Francisco" at www.healthysanfrancisco.org. (Chinese language available)
